

MUTATION RESEARCH

International journal on mutagenesis,
chromosome breakage and related subjects

Board of Managing Editors

F.H. Sobels, Leiden (Chairman)

B.W. Glickman, Toronto, Ont.

P.C. Hanawalt, Stanford, CA (DNA Repair Reports)

P.H.M. Lohman, Rijswijk (DNA Repair Reports)

R.J. Preston, Oak Ridge, TN (Mutation Research Letters)

K. Sankaranarayanan, Leiden

F.J. de Serres, Research Triangle Park, NC

M.D. Shelby, Research Triangle Park, NC

H. Takebe, Kyoto (DNA Repair Reports)

E. Vogel, Leiden

J.S. Wassom, Oak Ridge, TN

MUTATION RESEARCH

International journal on mutagenesis, chromosome breakage and related subjects

Publication schedule for 1986

MR is published according to a volume-numbering scheme that embraces all sections of the journal, in addition each section has its own code colour.

Reg (green), 'regular' volumes; EMS (blue), Section on Environmental Mutagenesis and Related Subjects; DRR (brown), 'DNA Repair Reports', special section of Mutation Research; Rev (purple), Reviews in Genetic Toxicology; GTT (red), Genetic Toxicology Testing; MRLet (yellow), Mutation Research Letters.

1986	Reg	EMS	DRR	Rev	GTT	MRLet
Jan.	159/1	164/1	165/1	167/1	169/1	173/1
Feb.	159/2		165/2	167/2	169/2	173/2
Mar.	160/1	166/3			167/3	169/3
Apr.	160/2		166/1	168/1		170/1
May	160/3	166/2			168/2	170/2
June	161/1		166/3	168/3		170/3
July	161/2	164/4			166/2	171/1
Aug.	162/1		164/5	166/3		171/2
Sep.	162/2	164/6				171/3
Oct.	163/1					172/1
Nov.	163/2					172/2
Dec.	163/3					172/3
	INDEX *					
17 Vols. 159-175 54 issues + INDEX	5 Vols. 159-163 12 issues	1 Vol. 164 6 issues	2 Vols. 165, 166 6 issues	2 Vols. 167, 168 6 issues	4 Vols. 169-172 12 issues	3 Vols. 173-175 12 issues

* Author Index and Subject Index for the year 1986 (covering all sections).

Subscription Information 1986

MUTATION RESEARCH (complete)

1986, Volumes 159-175 (17 volumes in 54 issues + Cumulative Index 1986)

Full subscription: Dfl. 3910.00 (US \$ 1737.75) + Dfl. 408.00 (US \$ 181.50) postage, packaging and handling. Total price Dfl. 4318.00 (US \$ 1919.25)

MUTATION RESEARCH/DNA REPAIR REPORTS

1986, Volumes 165, 166 (2 volumes in 6 issues)

Part subscription: Dfl. 460.00 (US \$ 204.50) + Dfl. 48.00 (US \$ 21.50) postage, packaging and handling. Total price Dfl. 508.00 (US \$ 226.00)

MUTATION RESEARCH/REVIEWS IN GENETIC TOXICOLOGY

1986, Volumes 167, 168 (2 volumes in 6 issues)

Part subscription: Dfl. 460.00 (US \$ 204.50) + Dfl. 48.00 (US \$ 21.50) postage, packaging and handling. Total price Dfl. 508.00 (US \$ 226.00)

MUTATION RESEARCH/GENETIC TOXICOLOGY TESTING

1986, Volumes 169-172 (4 volumes in 12 issues)

Part subscription: Dfl. 920.00 (US \$ 409.00) + Dfl. 96.00 (US \$ 43.00) postage, packaging and handling. Total price Dfl. 1016.00 (US \$ 452.00)

MUTATION RESEARCH LETTERS

1986, Volumes 173-175 (3 volumes in 12 issues)

Part subscription: Dfl. 690.00 (US \$ 366.75) + Dfl. 72.00 (US \$ 32.00) postage, packaging and handling. Total price Dfl. 762.00 (US \$ 398.75)

The Dutch guilder price is definitive. The US dollar price is subject to exchange rate fluctuations and is only given as a guide.

Journals are sent by surface delivery to all countries, except the following countries where SAL air delivery (Surface Airlifted Mail) is ensured: U.S.A., Canada, Japan, Australia, New Zealand, P.R. China, India, Israel, South Africa, Malaysia, Singapore, South Korea, Taiwan, Pakistan, Hong Kong, Brazil, Argentina, Mexico and Thailand. Air mail rates for other countries are available on request.

Subscription orders can only be entered by calendar year (Jan.-Dec.) and should be sent to: Elsevier Science Publishers, Journals Department, P.O. Box 211, 1000 AE Amsterdam (The Netherlands), telex 18582 ESPA NL, or to your usual subscription agent.

Claims for missing issues should be made within three months of publication, otherwise they cannot be honoured free of charge.

The Publisher reserves the right to issue additional volumes during the course of the year. Such volumes will be invoiced before publication and delivered after receipt of payment.

In the United States and Canada: For further information concerning this or any other Elsevier Science Publishers journal, contact Elsevier Science Publishers, Journal Information Center, 52 Vanderbilt Avenue, New York, NY 10017, tel. (212) 370-5520.

Reprints 50 reprints of each article are sent to the author(s) free of charge. Additional reprints can be ordered by the author(s).

Advertising For advertising rates apply to the Publishers.

ELSEVIER SCIENCE PUBLISHERS B.V.
AMSTERDAM

© 1986, Elsevier Science Publishers B.V. (Biomedical Division)

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or otherwise, without the permission of the publisher, Elsevier Science Publishers B.V. (Biomedical Division), P.O. Box 1527, 1000 BM Amsterdam (The Netherlands).

Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, SALEM, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee of U.S. \$2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purpose, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Cumulative Subject Index 1986

Volumes 159-175

- Acetaldehyde, SCE induction in peripheral lymphocytes, 174, 47
 -, toxicity, in root-meristem cells of *A. cepa*, 171, 139
 Acetone, enzyme-generated triplet, damage induced in lambda phage DNA, 165, 9
 2-Acetylaminofluorene, mutagenic activation, effect of AF in, 175, 153
 -, quercetin as comutagen, 162, 179
 4-Acetylaminofluorene, mitogenic activity, 172, 271
N-Acetyl derivative, Glu-P-1, glutamic acid pyrolysate, 175, 23
N-Acetyltransferase, tissue distribution, 164, 276
 Acridine mustard, mutations induced in *ade2* of *S. cerevisiae*, 160, 207
 Acrylamide, dominant lethal effects in male mice, 173, 35
 -, non-mutagenicity to *Salmonella*, 163, 2
 -, subchronic administration, dominant lethal effects, 173, 273
Actinomadura roseoviolacea, SN-07 from, 164, 286
 Actinomycin C, affecting insect fertility, 173, 197
 Actinomycin D, aneuploidy activity profile, 167, 180
 Adenine, influence on spontaneous reversion frequencies in haploid yeasts, 174, 189
 ADP-ribosyl transferase, activity, DNA-damaging-agent-stimulated, 174, 233
 ADP-ribosylation, inhibition, increase of X-ray-induced CA, 175, 33
 Adriamycin, induction of meiotic MN, 171, 149
 Aerosols, inhaled, MN test, cytogenetic effect, 170, 79
 AET, antimutagenic property of, in mouse spermatogonia, 159, 75
 Aflatoxin B₁, mutagenic activation by cytochrome P-450, 174, 85
 -, mutagenicity, factors influencing, 175, 223
 Airborne particle extract, genotoxicity in mice, 171, 157
 Airborne particulates, cytogenetic effect in human lymphocytes, 175, 97
 -, genotoxic effects, 164, 297
 -, mutagenic activity, 164, 279
 Airplane emissions, 171, 99
 Alkaline phosphatase, activity determination, 164, 353
 Alkylating agents, elimination of mutagenic lesions induced by, in CH V79 cells, 165, 185
 -, nickel(II) as comutagen, 162, 187
 -, sensitive yeast mutant, *ngs1*, 165, 129
O-Alkylation, in DNA, chromosome breakage in *D. melanogaster*, 162, 201
 Alkyl-2-hydroxy-2-cyclopenten-1-ones, in cigarette smoke condensate, 169, 129
Allium cepa, effect of deltamethrin, 171, 25
 -, root meristems, effect of caffeine, 164, 327
 -, root tips, treated with NTA, 171, 145

Maleic hydrazide, (*continued*)

- , SCE induction, 163, 57
- Man, radiation genetic risk evaluation, 160, 73
- Mammalian, assays, in vivo, comparison with in vitro assays, mutagen detection, 167, 189
- , cells in culture, chemically induced aneuploidy, 167, 89
- , male germ cells, chemical-induced aneuploidy, 167, 123
- , microsomal assay, *S. typhimurium*, 168, 69
- , somatic cells in vivo, aneuploidy in, 167, 107
- , systems, aneuploidy tests, activity of chemicals, 167, 186
- , tissues, DNA damage in, 164, 266
- Marine fish, induction of SCE and CA, 172, 165
- Mazindol, genotoxicity, 169, 171
- Meat, fried, mutagen formation in, 175, 145
- Medfly, effect of EMS, 163, 247
- mei-41* mutants, *D. melanogaster*, hypersensitivity to hydroxy-urea, 163, 157
- MeIQ, metabolic conversion to bacterial mutagens, 163, 109
- MeIQx, in smoked dry bonito, 164, 271
- Membrane lipid composition, influence on lipid peroxidation in rat-liver S9, 162, 21
- Mesityl oxide, mutagen production by chlorination, 169, 1
- Metallothionein protein variants, DNA and RNA ethylations, 164, 361
- Metaphase finding capability of the Cytoscan-110, 164, 101
- 8-Methoxypsoralen, DNA photobinding, 161, 181
- , plus near-UV, mutagenesis by, 163, 209
- 7-Methylbenz[c]acridine, mutagenicity of metabolites, 164, 194
- Methyl bromide, MN test, 164, 269
- Methyl chloride, exposure, rat tissue/organs, UDS in, 162, 219
- O*⁶-Methylguanine methyltransferase, gene, *E. coli*, transfer into repair-deficient human cells, 166, 135
- , in normal human cells, and in hypermutable Bloom's syndrome cells, 173, 141
- O*⁶-Methylguanine, site-specific mutagenesis, 162, 153
- Methylisocyanate, mutagenicity to cultured mammalian cells, 174, 285
- Methyl mercury, 168, 281
- Methyl methanesulphonate, damage of bacteriophage T7, 162, 137
- , gene conversion induction in *S. cerevisiae*, 174, 271
- , induction of DNA breakage in spermiogenic stages of mice, 159, 55
- , inhibition of DNA polymerase activity, 165, 71
- , mutants hypersensitive to, DNA repair in *Aspergillus*, 161, 119
- , mutation induction, 164, 272
- Methylnitronitrosoguanidine, activity in mouse bone marrow micronucleus assay, 163, 2
- , restoration of cellular resistance to, 166, 135
- , treatment of SHE cells, 162, 91
- Methyl nitrosourea, effect on mouse L5178Y cells, 161, 91
- , induction of CA and gene mutations in human lymphoblasts, 160, 95
- , mutagenesis in *E. coli*, enhancement by cysteamine, 173, 163
- 7-Methylpyridopsoralen, DNA photobinding, 161, 181
- α -Methylstyrene oxide derivatives, *para*-substituted, 171, 63
- Methylviologen, effects on *E. coli*, 163, 15
- Methylxanthines, genotoxicity, short-term assays, 169, 105, 115
- Metronidazole, DNA-repair host-mediated assay, 164, 9
- Micro-BIA, colorimetric microtiter assay of lambda prophage induction, 164, 31
- Microfilaments, 168; 260
- Micronucleus, assay, mouse, slide preparation, 164, 217
- , –, parametric and non-parametric analysis, 159, 139
- , –, staining procedure, haematoxylin and eosin, 164, 237
- , induction, by benzene, sex difference in mice, 164, 281
- , –, rates, in different mouse strains, 164, 109
- , production in buccal epithelial cells, by curried foods, 171, 185
- , spermatids in seminal fluid of smokers and nonsmokers, 172, 255
- , test, dyes, genetic toxicological testing, 170, 75
- , –, flow cytometry in, 164, 267
- , –, inhaled aerosols, cytogenetic effect, 170, 79
- , –, peripheral blood erythrocytes of *P. waltl*, 164, 245
- , –, rodent, in vivo, qualitative comparison with bacterial test, 167, 196
- , –, sex difference, 172, 151

- , gene conversion inducibility, 174, 271
- , glutathione-deficient mutants of, 173, 117
- , inducible error-prone repair, 159, 31
- , induction of aneuploidy by hydroxyurea, 160, 19
- , mitotic aneuploidy induction, 163, 23
- , UV mutagenesis model, 164, 298
- Salmonella/erythrocyte assay, activity of 2-AF, 174, 169
- Salmonella/hepatocyte suspension assay, activity of mutagens, 164, 41
- Salmonella/microsome assay, chemicals with discordant results, 168, 226
- , chemicals evaluated, 168, 76
- , correlation of mutagenicity and carcinogenicity results, 168, 218
- , features, 168, 73
- , negative results, 168, 203

- Salmonella/microsome assay, (*continued*)
- , nondefinitive results, 168, 207
 - , positive results, 168, 184
 - , study design recommendations, 168, 229
- Salmonella/microsome test strains, relevant genetic markers, 168, 72
- Salmonella test, genetic hazard evaluation, 168, 233
- , role in chemical safety evaluation, 168, 233
 - , system, combined mutagenicity of Co(II) salt and hetero-aromatic compounds, 172, 97
- Salmonella tester strains, mutagenic potential of cordycepin, 174, 179
- Salmonella typhimurium*, 5-AzaC induced mutation, 160, 249
- , forward mutation assays, internal survival standard, 174, 259
 - , mammalian microsomal assay, 168, 69
 - , mutagenicity of nitrophenyls, 163, 101
 - , mutations in, recovered from livers and spleens of mice, 159, 1
 - , psoralen photomutagenic specificity, 160, 195
- SCE, additive, human lymphocytes, 164, 274
- , analysis, in familial and sporadic MS, 161, 65
 - , in childhood in relation to age and sex, 174, 309
 - , cytostatic drugs, 174, 213
 - , in developing eggs of *Mytilus galloprovincialis*, 174, 207
 - , discrepancy, in vitro, embryonic and extraembryonic mouse tissues, 163, 175
 - , effect of EMF, 172, 177
 - , frequencies, in lymphocytes of patients with connective tissue diseases, 162, 113
 - , frequency, proliferation-dependent reduction, induced by MMC, 163, 167
 - , during gestation and postpartal phase, 164, 290
 - , human lymphocytes, cell-stage dependence, 162, 121
 - , –, chemical induction, 174, 67
 - , increased frequency, extreme culture conditions, 171, 189
 - , induced by maleic hydrazide, 163, 57
 - , induction, in heroin addicts, 170, 125
 - , –, by replication of BrUra-containing DNA, 163, 41
 - , influence of BrdUrd, 163, 51
 - , malnourished animals, 175, 29
 - , mouse lymphocytes, strain difference, 164, 275
 - , in newborns, 163, 99
 - , nonsteroidal antiarthritic drugs, 174, 131
 - , rate, in 7th-Day Adventists, 162, 131
 - , –, in lymphocytes of MS patients, 160, 215
 - , spontaneous, during pregnancy, 174, 27
 - , test, relation with HPRT test, 164, 298
 - , variation, 171, 43
- Selenium salts, tissue-specific clastogenic effects, 169, 61
- Seminiferous tubules, rat, mutagen effects on, 171, 149
- Serotonin, antimutagenic property of, in mouse spermatogonia, 159, 75
- Seventh-Day Adventists, SCE rate in, 162, 131
- Sex difference, micronucleus test, 172, 151
- Shamma, genotoxicity, 169, 41
- Short-term assays, deployment, for detection of carcinogens, 168, 327
- Simian virus 40, transformation of XP group D cell line, 166, 287
- , transformed Fanconi anaemia, 166, 207
- Sister-chromatid exchange, *see* SCE
- Small intestine, in vivo assay, 164, 209
- Smokers, amniotic fluid, mutagenicity testing, 175, 195
- , long-term heavy, CA in lymphocytes, 170, 145
 - , seminal fluid, micronucleated spermatids, 172, 255
- Sodium arsenite, enhancement of frequency of CA, 163, 263
- Sodium fluoride, in DNA-repair studies, 172, 77
- , lack of DNA-strand breaks in rat testicular cells, 170, 85
- Sodium iothalamate, frequency ratio of acentrics to dicentrics, 174, 75
- SOS chromotest, agar spot test, *E. coli*, 171, 83
- , enzymatic activity, metabolic activation, 164, 353
- SOS functions, induction in *E. coli* by NO₂, 162, 1
- SOS response, in *E. coli*, survival and induction by 5-azacytidine, 166, 9
- SOS spot test, *E. coli*, mycotoxin genotoxicity, 171, 79
- SOS/Umu test, validation, 175, 139
- Soybean tester strains, mutagenic potential of cordycepin, 174, 179
- Soy sauce, treated with nitrite, mutagenicity, 174, 255
- Specific locus mutations, in offspring of X-irradiated male mice, 159, 47
- Sperm, human, CA, after radiotherapy, 174, 219
- Spermatocytes, mouse, chromosome univalency and aneuploidy, 163, 285
- , rat, UDS in, 162, 219
- Spermatogenesis, mouse, effect of doxorubicin and 4'-epidoxorubicin, 160, 39
- Spermatogonia, mouse, ENU treatment, 162, 69
- , –, translocations in, dose-effect relations, 173, 41
 - , stem-cell, congenital abnormalities, 163, 299
 - , treatment with formaldehyde and X-irradiation, 175, 61
- Spindle, differential staining, 171, 177
- , disturbances, chemical induction, 168, 249
 - , disturbing compounds, 168, 268
- Spontaneous mutations, radiation genetic risk evaluation in man, 160, 73
- Spy dust, science or politics, 164, 1
- Sterigmatocystin, related compounds, genotoxic effects, 173, 217
- Sterol hydroperoxides, mutagenic, 161, 39
- Steviol, bacterial mutagenicity mediated by, 169, 93
- Storage batteries, factory, CA in workers at, 171, 53
- Streptococcus faecalis*, vaporization of mutagenic chemicals, 164, 283
- Streptomyces coelicolor*, Weigle activation of VP5 phage in, 175, 217
- Streptomyces* sp., antimutagens produced by, 164, 278
- Streptomycin-dependent *E. coli* strains, 164, 280
- Streptomycin, resistance of *E. coli*, 175, 199
- Streptozotocin, in *E. coli*, 166, 229
- Strontium, β -particles, induction of CA, 163, 277
- Styrene, induction of CA in human lymphocytes, 159, 109
- Styrene oxide, mutagenicity, 171, 63
- sulA* gene, SOS induction, inhibition, 175, 17

- Sulphite pulp, bleaching liquor, mutagenic properties, 172, 89
- Sulphur mustard toxicity, potentiation by caffeine, 165, 207
- Sulphydryls, effects on, in relation to spindle disturbances, 168, 286
- Superoxide radicals, mutagenic and cytotoxic effects, 163, 15
- Surfactants, effect on induction of CA, 164, 273
- SV40 DNA, integrated, induction, from transformed mammalian cells, 165, 47
- Synaptonemal complex karyotyping, irradiated male mice, 174, 59
- Syrian hamster embryo, diploid cells, treatment of MNNG, 162, 91
- 2,4,5-T, manufacture, release of TCDD during, 168, 241
- TCDD, release during manufacture of 2,4,5-T, 168, 241
- T-cell receptor gene restriction fragment patterns, determination, 173, 67
- TEM, CA induction in *V. faba*, 173, 187
- Temperature, effect on SCE in human lymphocytes, 174, 15
- Tetrachlorodibenzo-*p*-dioxin, mutagenicity and genotoxicity, 168, 241
- Tetrachlorodibenzofuran, effect on microsomal monooxygenase activity, 174, 93
- Theobromine, genotoxicity, in short-term assays, 169, 105
- Therapeutic ultrasound, SCE in human lymphocytes, 172, 185
- Thialysine, resistant clone of CHO cells, 173, 223
- Thimet 10-G, mutagenicity, 171, 131
- Thiocarbamate herbicides, 168, 301
- 6-Thioguanine, resistant human peripheral blood lymphocytes, 173, 61
- , resistant mutants, in dividing V79 cells, 159, 91
- , –, V79 Chinese hamster cells, 171, 165
- Thiourea, genotoxicity of, 163, 1
- Thymidine, degradation by human peripheral blood platelets, 163, 75
- , effect on later exposure by ionizing radiation, 164, 347
- , incorporation, in mouse, effect of halogenated aliphatic hydrocarbons, 163, 193
- , kinase, activity, TK-deficient mutants, 161, 165
- , –, gene, herpes simplex virus, 163, 3
- , –, locus, gene mutation induction by γ -irradiation, 174, 149
- , replacement by bromodeoxyuridine, influence on SCE and CA, 174, 295
- Tilorone, SOS chromotest, 172, 47
- TLC/Salmonella assay, modified version, for screening complex hazardous wastes, 169, 81
- Toadfish, hepatic postmitochondrial fractions, activation and detoxication of promutagens, in Salmonella assay, 164, 81
- p*-Tolylhydrazine, BLT, 173, 233
- Toluene, photochemical reaction products with NO₂, induction of SCE in CH V79 cells, 173, 135
- Toxaphene, mutagenic potential, 164, 197
- Transition mutations, spontaneous, differential enhancement, 175, 41
- Translocation homozygosity, reduced sperm count, mouse, 163, 181

- Valerianaceae roots, tranquilizing constituents, bacterial mutagenicity, 169, 23
- Valtrate, genotoxic activity, 169, 23
- Vegetable juices, suppression of DMBA-induced CA in rat bone marrow cells, 172, 55
- Vicia faba*, reduction of yield of CA, 173, 187
- , root tip meristems, heat shock reduction of MH-induced aberration yield, 174, 199
- , root tips, treated with NTA, 171, 145
- Vinblastine, aneuploidy activity profile, 167, 177
- Vinca alkaloids, 168, 270
- Vincristine sulphate, exposure of rat fibroblasts to, 164, 369
- Vindesine, spindle poison in mammals, 174, 11
- Vinyl acetate, induction of CA in human lymphocytes, 159, 109
- Viruses, as environmental mutagenic factors, 167, 203
- Virus-transformed cell lines, in XP groups, 165, 175
- Vitamin C, antimutagenic activity, 164, 273
- Voacristine, effects in yeast, 171, 17

- Walker rat carcinoma cells, cisplatin-sensitivity, 166, 157
- Walker rat tumour cells, sensitive to disfunctional agents, 166, 157, 169
- Wasted mouse, animal model for AT, 161, 83
- Water, mutagenicity testing, 164, 295
- Weigle activation, in *S. coelicolor*, 175, 217
- Wood stoves, airborne particulate matter, 171, 91
- Xanthine oxidase-mediated mutagenicity of NBP, 172, 37
- Xanthone, hydroxyl derivatives, 164, 274
- Xeroderma pigmentosum, cell lines from, high radiation sensitivity, 166, 215
- , cells, mutagenicity test, 164, 282
- , complementation groups, transient correction of excision repair defects, 165, 199
- , fibroblasts, microinjection of *E. coli* proteins, 166, 89
- , group A, DNA excision repair, definition of characteristics, 166, 79
- , group C, excision repair in, 165, 165
- , group D cell line, SV40-transformed, 166, 287
- , HCR and UVER of HSV-2, 166, 99
- , virus-transformed cell lines, 165, 175
- xrs* mutants, CHO cell line, chromosome damage, 166, 255
- xthA* mutant, *E. coli*, ascorbate sensitivity, 174, 265
- Yakitori, detection of 1-nitropyrene, 171, 105
- Yeast, aneuploidy-inducing chemicals in, 174, 11
- , haploid, spontaneous reversion frequencies, adenine influence, 174, 189
- , inducible error-prone repair, 159, 31
- , induction of mutational alterations by ionizing radiation, 163, 233
- , mutant, *ngs1*, alkylating-agent-sensitive, 165, 129
- , photoreactivating enzyme, microinjection, UDS in XP cells, 165, 109
- , screening system, for monitoring multiple genetic endpoints, 161, 49
- Yemeni snuff, genotoxicity, 169, 41
- Zinc, deficiency, 168, 343
- Zinc, mutagenicity, carcinogenicity, teratogenicity, 168, 343
- Zinc sulphate, reduction of yield of CA in *V. faba*, 173, 187

MUTATION RESEARCH

International journal on mutagenesis, chromosome breakage and related subjects

INSTRUCTIONS TO AUTHORS

Types of paper *Mutation Research* contains 3 types of publication.

(1) Papers reporting results of original fundamental research concerning mutagenesis, chromosome breakage and related subjects. (2) Review articles. (3) Short communications (published in the Section *Mutation Research Letters*).

General arrangement of papers Papers should be preferably in English, but may also be submitted in French or German. A summary (about 300 words) is mandatory for all (normal-length) articles. Papers in German or French should have a summary in English. The first paragraph of the article should summarize the research problem and the pertinent findings. The main text may be divided into sections such as Materials and methods, Experimental, Results, Discussion.

In papers mentioning chemicals, authors are requested to include *CAS registry numbers*. Registry numbers can be found by consulting Chemical Abstracts Ninth Collective Molecule Formula Index, by using Lockheed's computer access file named Chemline or by contacting the Chemical Abstracts Service, P.O. Box 3012, Columbus, Ohio 43210 (U.S.A.).

Keywords A list of 3–6 words or short phrases should be included on the first page of the manuscript. In the event that keywords are not supplied editorial discretion will be exercised in introducing appropriate words.

Preparation of text (a) Manuscripts should be typewritten, double-spaced with wide margins, on one side of the paper only. Legends, footnotes—everything—must also be double-spaced. (b) The full postal address(es) of the author(s), including postal code and country, should be given after their name(s). (c) Line-drawn figures (including graphs) should be submitted in black ink on white paper and must be lettered ready for direct reproduction. Sharp photoprints of lettered line drawings may also be submitted. It is important that the drawings themselves AND the lettering are in proportion and large enough to allow for reduction before printing. Figures should be prepared suitably for either one column width (76 mm) or the entire page width (160 mm). The maximum height is 206 mm. The amount of reduction that will be made can be judged from the sizes of figures in recent issues of the journal. (d) Half-tone figures should be submitted as very sharp and contrasty glossy photoprints, separate from line drawings. (e) Legends for both line-drawn and half-tone figures should be typed on separate sheets. (f) Tables (also to be typed double-spaced) should be provided with headings. (g) Typescripts should be carefully checked before submission to obviate alterations after acceptance.

References The journal uses the Harvard system, in which names and dates are given in the body of the text and an alphabetical list of references at the end of the manuscript. References in the text should give the author's surname with the year of publication, e.g.: Smith (1980); Smith and Jones (1967a, 1979b); Baker et al. (1978). In the list of references, titles of journals should be abbreviated to conform with *Chemical Abstracts Bibliographic Guide for Authors and Editors* 1974. References to books should give details of chapter title, editors, title of the book, publishers and their location.

Examples:

Ehrenberg, L., and C.A. Wachtmeister (1977) Safety precautions in work with mutagenic and carcinogenic chemicals, in: B.J. Kilbey, M.S. Legator, W. Nichols and C. Ramel (Eds.), *Handbook of Mutagenicity Test Procedures*, Elsevier, Amsterdam, pp. 401–410.

Kastenbaum, M.A., and K.O. Bowman (1970) Tables for determining the statistical significance of mutation frequencies, *Mutation Res.*, 9, 527–549.

Contributions—in triplicate (one original plus two copies, also of the illustrations)—may be sent to Prof. F.H. Sobels, Editor-in-Chief, *Mutation Research*, Department of Radiation Genetics and Chemical Mutagenesis, State University of Leiden, Sylvius Laboratories, Wassenaarseweg 72, P.O. Box 9503, 2300 RA Leiden (The Netherlands).

or to

Dr. M.D. Shelby, *Mutation Research*, NIEHS, P.O. Box 12233, Research Triangle Park, NC 27709 (U.S.A.).

Manuscripts in the field of Molecular Genetics may be submitted to

Dr. B.W. Glickman, *Mutation Research*, Biology Department, York University, 4700 Keele Street, Toronto, Ont. M3J 1P3 (Canada).

Reprints 50 reprints of each article are sent to the author(s) free of charge. Additional reprints can be ordered by the author(s).

Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

GASTROINTESTINAL TOXICOLOGY

edited by K. ROZMAN and O. HÄNNINEN

This book is the first to cover all known aspects (theoretical and practical) of gastrointestinal toxicology. It is organized in five sections:

- Functional characteristics and responses of the gastrointestinal tract.
- Biochemical and immunological characteristics and responses of the gastrointestinal tract.
- Structural characteristics and responses of the gastrointestinal tract
- Classes of substances with gastrointestinal toxicity.
- Applications of gastrointestinal toxicology

Gastrointestinal Toxicology is comprehensive and deals with the phenomena described from a variety of viewpoints. It is a unique source of reference for researchers and clinicians with an interest in gastrointestinal processes.

CONTENTS:

Introduction.

Section I. Functional characteristics

Chapter 1. Gastrointestinal physiology by P.L. Smith.

1. Introduction
2. Structural organization
3. Intestinal smooth muscle
4. The mucosal epithelium
5. Methods for studying intestinal transport
6. Mechanisms and regulation of intestinal transport
7. Summary

Chapter 2. Gastrointestinal absorption of toxic agents by B. Aungst and D.D. Shen.

1. Introduction
2. Mechanisms of gastrointestinal absorption
3. Physiological considerations
4. Physicochemical considerations
5. Formulation factors
6. Methodologies for assessment of gastrointestinal absorption
7. Summary.

Chapter 3. Enterohepatic circulation of toxicants by Z. Gregus and C.D. Klaassen.

1. Introduction
2. Process of enterohepatic circulation
3. Detection of enterohepatic circulation
4. Chemicals subject to enterohepatic circulation
5. Alteration of enterohepatic circulation
6. Consequences of enterohepatic circulation
7. Summary

Chapter 4. Fecal excretion of toxic substances by K. Rozman.

1. Introduction
2. Origin of fecal excretion of xenobiotics
3. Factors influencing fecal excretion of xenobiotics
4. Methods in studying fecal excretion of xenobiotics
5. Kinetic considerations in fecal excretion of xenobiotics
6. Summary

Section II. Biochemical and immunological characteristics.

Chapter 5. Biochemistry of the gastrointestinal tract by O. Hänninen.

1. Introduction
2. Energy metabolism
3. Cell restitution and regeneration
4. Production of glycoproteins, enzymes and protons
5. Metabolic gradients in the gut and chemical loading

6. Maintenance of the connective tissue
7. Biochemistry of the gut wall muscle
8. Summary

Chapter 6. Mucosal biotransformations by M. Laitinen and J.B. Watkins, III.

1. Introduction
2. Biotransformation reactions
3. Modification of intestinal biotransformation
4. Summary

Chapter 7. Interactions of xenobiotics with the gastrointestinal flora by K. Pelkonen and O. Hänninen.

1. Introduction
2. Gastrointestinal microflora
3. Gnotobiotic animals in toxicological research
4. Biotransformations of xenobiotics by the flora
5. Factors affecting the flora
6. Summary

Chapter 8. Immunoresponse in the gastrointestinal tract by A. Naukkarinen and K.J. Syrjänen.

1. Introduction
2. Structural organization of lymphatic elements in the gastrointestinal tract
3. Cell types involved in immunologic phenomena in gut-associated lymphoid tissues
4. Homing and migratory properties of the cells in gut-associated lymphoid tissues
5. Uptake and processing of antigens in gut-associated lymphoid tissues
6. Cellular interactions in immunoresponse in gut-associated lymphoid tissues
7. Organization of the mucosal secretory immune system
8. Function of the mucosal immune system
9. Effects of toxic environmental agents on the local immunity in gut-associated lymphoid tissues
10. Summary

Section III. Structural characteristics.

Chapter 9. Morphology of the gastrointestinal tract by M.J. Iatropoulos

1. Introduction
2. Embryology, growth, proliferation and differentiation of epithelial elements
3. The gastrointestinal tract
4. Summary

Chapter 10. Ulcerative and inflammatory lesions by M.J. Iatropoulos and T.E. Davis.

1. Introduction
2. Overview
3. Ulcerative and inflammatory lesions induced by chemicals
4. Summary

Chapter 11. Proliferative lesions by H.J. Van Kruiningen.

1. Introduction
2. Gastrointestinal segments
3. Agents

Section IV. Classes of toxic substances.

Chapter 12. Foods, food additives and contaminants in gastrointestinal toxicology by A. Hallikainen and S. Salminen.

1. Introduction
2. Food-induced changes in gastrointestinal pathology
3. Factors affecting food components in the gastrointestinal tract
4. Toxic food components
5. Food constituents
6. Food additives
7. Contaminants
8. Exposure of the gastrointestinal tract to toxic food components

9. Dietary guidelines
10. Summary

Chapter 13. Toxicants in the gastrointestinal tract: drugs by V.M.K. Venho.

1. Introduction
2. Mouth and pharynx
3. Esophagus
4. Stomach
5. Small and large intestine
6. Summary

Chapter 14. Industrial and environmental chemicals by E. Scheufler and K. Rozman.

1. Introduction
2. Industrial and environmental chemicals affecting the gastrointestinal tract
3. Summary

Chapter 15. Metals by H.M. Mykkänen.

1. Introduction
2. Sources of metals producing gastrointestinal side effects
3. Factors affecting the gastrointestinal toxicity of metals
4. Toxic effects of metals in the gastrointestinal tract
5. Gastrointestinal toxicity of metals
6. Summary

Section V. Applications of gastrointestinal toxicology.

Chapter 16. Clinical gastrointestinal disorders by Gy. Mózsik and W. Snodgrass.

1. Introduction
2. Drug-induced gastrointestinal disorders in man
3. Chemically induced gastrointestinal disorders in man
4. Gastrointestinal cancer in man
5. Household agents causing gastrointestinal injury in man
6. Gastrointestinal decontamination - treatment of acute and chronic poisoning in man
7. Summary

Chapter 17. Veterinary gastrointestinal toxicology by F.W. Oehme and D.S. Barrett.

1. Introduction
2. Importance of digestive tract anatomy and physiology for the toxicology expressed
3. Toxicoses commonly observed in various animal species
4. Gastrointestinal toxicoses
5. Significance of species differences
6. Summary

Chapter 18. Gastrointestinal toxicifications and detoxifications in ruminants in relation to resource management by G.S. Smith.

1. Introduction
2. Rumen function
3. Toxicifications and detoxifications in the rumen
4. Ruminants as converters of by-products and waste
5. Metabolism of xenobiotics by ruminants
6. Assessments of risk to humans from feeds for ruminants.
7. Summary

Subject Index.

1986: approx 570 pages
Price: US \$ 154.00 / Dfl. 385.00
ISBN 0-444-90424-7

The US \$ price is valid only in North America and can be used as a guidance for the rest of the world. The Dutch guilder price (Dfl.) is valid outside North America and does not include B.T.W. for Dutch customers. All prices are subject to change without notice.

FROM THE SERIES

DEVELOPMENTS IN TOXICOLOGY AND ENVIRONMENTAL SCIENCE

Environmental Annoyance: Characterization, Measurement, and Control

Volume 15

Proceedings for the International Symposium on Environmental Annoyance, held at the Conference Centre Woudschoten, The Netherlands, 15-18 September, 1986

edited by H. S. Koelega

1987 viii + 424 pages
Price: US \$ 111.00/Dfl. 250.00
ISBN Volume 0-444-80865-5
ISBN Series 0-444-80013-1

Environmental annoyance reflects a negative evaluation of environmental conditions which may affect health and productivity adversely, and may contribute to the development of stress. This book brings together the proceedings of a workshop in which, for the first time, researchers recruited from a diversity of areas of annoyance research (malodours, noise, particulates, chemical pollutants) came together in order to present a perspective on human response to environmental nuisances.

Nephrotoxicity of Antibiotics and Immunosuppressants

Volume 14

Proceedings of the Satellite Symposium of the IVth International Congress of Toxicology on Nephrotoxicity of Antibiotics and Immunosuppressants, held in Sapporo, Japan, 26-28 July 1986

edited by T. Tanabe, J. B. Hook and H. Endou

1986 xii + 256 pages
Price: US \$ 80.00/Dfl. 180.00
ISBN 0-444-80858-2

Research and developments in the nephrotoxicity of various antibiotics and immunosuppressants were presented by basic scientists and clinicians. Clinical and basic science data shared at the symposium has led to a significant increase in the understanding of the toxicity of those compounds, and hopefully, paradigms of treatment that will reduce toxicity in patients.

Carcinogenic and Mutagenic Effects of Diesel Engine Exhaust

Volume 13

Proceedings of the International Symposium on Toxicological Effects of Emissions from Diesel Engines held in Tsukuba, Japan, 26-28 July, 1986

edited by N. Ishinishi, A. Koizumi, R. O. McClellan and W. Stöber

1986 xii + 540 pages
Price: US \$ 133.25/Dfl. 300.00
ISBN 0-444-80854

The purpose of this book, based on a recent symposium, is to focus on the carcinogenicity and other toxicological effects of emissions from diesel engines. Chemical and biological analytical methods and the concentrations of numerous constituents contained in emissions from diesel engines, and those present in the ambient air are extensively discussed. Furthermore, the book is completed by papers on genotoxicity, mutagenicity, critical metabolites of mono- or dinitro-pyrene, and the biological response of DNA from pseudokaryocytes up to tissues or organs; recent reports concerning nitro-arenes and tar materials extracted from emissions of diesel engines, and introduced into small experimental animals. Papers were presented by researchers from

the automobile industry, the university research laboratories and the government environmental research laboratories of America, Europe and Japan. This book represents an important contribution to research concerning the toxicity of diesel emissions.

New Concepts and Developments in Toxicology

Volume 12

Proceedings of the Fourth International Congress of Toxicology held in Tokyo, Japan, 21-25 July 1986

edited by P. Chambers, P. Gehring and F. Sakai

1986 x + 412 pages
Price: US \$ 102.25/Dfl. 230.00
ISBN 0-444-80848-5

The aim of this book is to communicate and elucidate new concepts and developments in toxicology, ultimately to promote the utilization of the best available methodology and knowledge to minimize the potential untoward effects of chemicals on health and the environment. International dissemination of this science is essential to the future wellbeing of both developed and developing nations.

At this prestigious world conference the following papers were presented: Reproductive and Developmental Toxicology-Identifying Hazards and Estimating Risks (5 papers), The Influence of Nutritional Factors on Chemical Toxicity (6 papers), Skin: as a Target Organ and Route of Exposure (5 papers), Evaluation of Multifaceted Toxicity of Bulk Chemicals; Trichloroethylene and Tetrachloroethylene (5 papers), Mycotoxins as a Tool for Toxicological Study (6 papers), Pharmacokinetics in Clinical Toxicology (5 papers), Advances in Research in Chemical Carcinogenesis (4 papers).

TOXICOLOGY

An international journal
concerned with
the effects of chemicals on living systems

Managing Editors:

H. P. WITSCHI, *Biology Division, Oak Ridge National Laboratory, P.O. Box Y, Oak Ridge TN, 37830 U.S.A.*

K. J. NETTER, *Department of Pharmacology and Toxicology, School of Medicine, University of Marburg, Lahnberge, D-3550 Marburg/Lahn, F.R.G.*

TOXICOLOGY is a journal for the publication of original scientific papers on the biological effects arising from the administration of chemical compounds, principally to animals, tissues or cells, but also to man. Such compounds include industrial chemicals and residues, chemical contaminants, consumer products, drugs, metals, pesticides, food additives, cosmetics, and additives to animal feeding stuffs. Preference will be given to investigations dealing with the mechanisms of action of toxic agents. Papers describing molecular interactions with cellular and genetic processes will be welcomed.

Quantitative toxicological studies will be published that are of relevance to risk assessment and regulatory management of exposure hazards and safety evaluation. This applies particularly to carcinogenicity, mutagenicity, embryotoxicity and related areas, as well as to alternatives to the use of animals in toxicological experimentation. Epidemiological studies bearing

toxicological significance to man fall within the scope of the journal. The Editors would also welcome the submission of concise and pertinent reviews on current issues in toxicology.

MUTATION RESEARCH

Publication schedule for 1987

MR is published according to a volume-numbering scheme that embraces all sections of the journal, in addition each section has its own code colour.

Reg (green), 'regular' volumes; EMS (blue), Section on Environmental Mutagenesis and Related Subjects; DRR (brown), 'DNA Repair Reports', special section of Mutation Research; Rev (purple), Reviews in Genetic Toxicology; GTT (red), Genetic Toxicology Testing; MRlett (yellow), Mutation Research Letters.

1987	Reg	EMS	DRR	Rev	GTT	MRlett
Jan.	176/1	182/1	183/1	185/1	187/1	190/1
Feb.	176/2				187/2	190/2
Mar.	177/1	182/2	183/2	185/2	187/3	190/3
Apr.	177/2				187/4	190/4
May	178/1	182/3	183/3	185/3	188/1	191/1

* Author Index and Subject Index for the year 1987 (covering all sections).

Subscription Information

MUTATION RESEARCH (complete)

1987, Volumes 176-192 (17 volumes in 55 issues)

Full subscription: Dfl.4080.00 (US \$1813.50) + Dfl.425.00 (US \$189.00) postage, packaging and handling. Total price Dfl.4505.00 (US \$2002.50).

MUTATION RESEARCH /DNA REPAIR REPORTS

1987, Volumes 183, 184 (2 volumes in 6 issues)

Part subscription: Dfl. 480.00 (US\$ 213.50) + Dfl. 50.00 (US\$ 22.00) postage, packaging and handling. Total price Dfl. 530.00 (US\$ 235.50).

MUTATION RESEARCH/REVIEWS IN GENETIC TOXICOLOGY

1987, Volumes 185, 186 (2 volumes in 6 issues)

Part subscription: Dfl. 480.00 (US\$ 213.50) + Dfl. 50.00 (US\$ 22.00) postage, packaging and handling. Total price Dfl. 530.00 (US\$ 235.50).

MUTATION RESEARCH/GENETIC TOXICOLOGY TESTING

1987, Volumes 187-189 (3 volumes in 12 issues)

Part subscription: Dfl. 720.00 (US\$ 320.00) + Dfl. 75.00 (US\$ 33.25) postage, packaging and handling. Total price Dfl. 795.00 (US\$ 353.25).

MUTATION RESEARCH LETTERS

1987, Volumes 190-192 (3 volumes in 12 issues)

Part subscription: Dfl. 720.00 (US\$ 320.00) + Dfl. 75.00 (US\$ 33.25) postage, packaging and handling. Total price Dfl. 795.00 (US\$ 353.25).

The Dutch guilder price is definitive. The US dollar price is subject to exchange rate fluctuations and is only given as a guide.

Journals are sent by surface delivery to all countries, except the following countries where SAL air delivery (Surface Airlifted Mail) is ensured: U.S.A., Canada, Japan, Australia, New Zealand, P.R. China, India, Israel, South Africa, Malaysia, Singapore, South Korea, Taiwan, Pakistan, Hong Kong, Brazil, Argentina, Mexico and Thailand. Air mail rates for other countries are available on request.

Subscription orders can only be entered by calendar year (Jan.-Dec.) and should be sent to: Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam (The Netherlands), telex 18582 ESPA NL, or to your usual subscription agent.

Claims for missing issues should be made within three months of publication, otherwise they cannot be honoured free of charge.

The Publisher reserves the right to issue additional volumes during the course of the year. Such volumes will be invoiced before publication and delivered after receipt of payment.

In the United States and Canada: For further information concerning this or any other Elsevier Science Publishers journal, contact Elsevier Science Publishers, Journal Information Center, 52 Vanderbilt Avenue, New York, NY 10017, tel. (212) 370-5520.

Reprints 50 reprints of each article are sent to the author(s) free of charge. Additional reprints can be ordered by the author(s).

Advertising For advertising rates apply to the Publishers.

Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the U.S.A. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee states in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, SALEM, MA 01970 (U.S.A.). If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1980 may be copied for a per-copy fee of U.S. \$2.25, also payable through the Center. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purpose, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
